WORK EXPERIENCE

Networking Intern - One Outsource Direct Corporation

2026 February - 2026 May

- Implemented a complete office IT infrastructure from scratch, including network setup, hardware deployment, and connectivity solutions.
- Managed and maintained network operations across two office locations, ensuring stable performance, security, and inter-office connectivity.
- Provided helpdesk support by troubleshooting hardware, software, and network issues, delivering timely resolutions to end users.
- Configured and monitored network devices while optimizing performance through proper IP addressing, subnetting, and VLAN management.

PROJECTS

UST IntACTS (Internationalization Activities and Credit Tracking System) - Project Head Developer

2025 – 2027

- Led the end-to-end development of the UST IntACTS web platform, overseeing both front-end and back-end implementation.
- Designed, developed, and deployed system features to streamline international academic engagement and credit-tracking processes.
- Managed database architecture, API integrations, and overall system design to ensure scalability, efficiency, and reliability.
- Coordinated project timelines, gathered requirements, and collaborated with stakeholders to ensure successful deployment and user adoption.

JDCCS Pharmacy Website - Quality Assurance Officer

2024 – 2025

- Conducted comprehensive code reviews to ensure accuracy, efficiency, and compliance with coding standards.
- Performed functional, integration, and usability testing to identify, document, and resolve system bugs and errors.
- Collaborated closely with developers to enhance system reliability, security, and overall performance.
- Documented test cases, test results, and quality improvement recommendations for continuous

system enhancement.

GSIS EduHealth – UST Python Project - Back-end Developer
2025

- Managed and implemented back-end logic and database functionalities of the system.
- Ensured all system functions operated correctly through rigorous testing and debugging.
- Developed and maintained back-end-exclusive features to support application requirements and performance.

EDUCATIONAL BACKGROUND

• **University of Santo Tomas**

Bachelor of Science in Information Technology, Specialized in Web and Mobile Application Development

2022 – 2027 (Expected)

• **University of the East Caloocan Senior High School**

ICT Track, Technical Drafting

2020 – 2022

SKILLS

- Programming Languages: Java, PHP, C++, JavaScript, (JSS) Python
- Web Development: Node.js, React, Firebase, Laravel
- Mobile Development: Android Studio (Java/Kotlin)
- Database Management: SQL, Firebase
- Networking & Security: Basic knowledge in network configuration and cybersecurity concepts
- Others: Object-Oriented Programming, Full-Stack Development
- Basic AutoCAD
